

I live in a small urban area of East Texas and wish to protest interference by the FCC in current local content coverage provided by XM Satellite Radio. For the first time in the ten years that I have lived in Texas-I feel that world news, sports, music, weather etc. are available at the touch of my dial. Since I pay for this service, I urge the FCC to reject the NBC PETITION 04-160. Please allow XM Satellite Radio provide the kind of programming demanded by its listeners.
